

A modern architectural scene featuring a concrete wall with a Pixii Home battery unit. In the background, a car is parked under a wooden pergola, and a woman in a striped dress walks past. The scene is set in a lush, green environment with tall grass in the foreground.

PIXII

Pixii Home

Energy storage made simple

Save more, spend less and live better

RESIDENTIAL ENERGY STORAGE

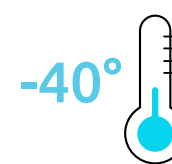

Pixii Home is a smart and reliable battery designed to lower your electricity bills, increase your energy independence, and support a greener future.

Built with industrial-grade quality and engineered to get the most out of your solar panels.

Pixii Home is housed in a durable, weatherproof metal casing and backed by a 10-year warranty, it's made to perform in tough Nordic conditions.

Whether you want to make the most of your solar power or generate income from trading energy, Pixii Home is your next step toward a sustainable, self-sufficient home.

Energy independence is now within reach – with clean, green energy.

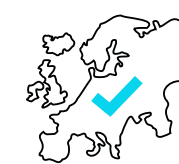

Optimized for Nordic conditions

Industrial-grade cabinet for the outdoors with a surface that minimizes heat build-up from direct sunlight. Operates at extreme temp. down to -40°C*

Modular technology -Grow as you go!

Future-proof modular and scalable design that allows you to add or swap components like batteries and PixiiBoxes as the technology evolves.

European quality and GDPR compliance

Designed in Norway and assembled in Europe following strict quality standards, Pixii Home is built for secure, reliable operation with strong data protection.

The BESS that pays for itself

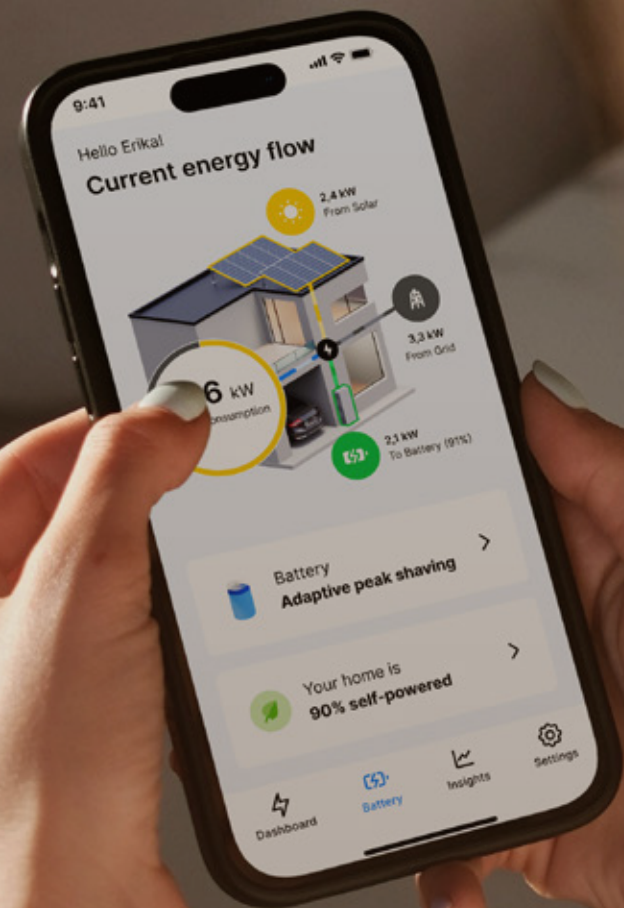

Generate income and maximize your return on investment by supporting the grid. Get paid for participating in the electricity market.

*Battery startup below 0°C may require internal heating and AC power, please refer to the "Temperature Table" in the Pixii Home guides.

Power at your fingertips!

Scan to download the Pixii Home app
from App Store or Google Play

Overview of your energy consumption

Track how much energy you produce, use, and store in real time. Embrace a smarter, energy independent lifestyle.

Performance at a glance

The app provides detailed monitoring of your battery's performance and health, ensuring optimal functionality and long life.

Watch your savings grow

The Pixii Home app estimates your energy savings, translating your efficient energy management into tangible financial benefits.

Start small and grow as you go!

Begin with 10kW/10kWh and expand
up to 20kW/20kWh as your energy
demands or family grows.

Pixii Home AC

Up to 20kW / 20kWh*

- Ideal for homes with existing solar
- Store your self produced solar energy
- Safe LFP battery technology
- Participate in income generating grid services

Pixii Home Hybrid

Up to 10kW / 20kWh / 15kWp*

- Ideal for new solar installations
- All-in-one easy installation
- Built-in solar inverter
- More efficient solar energy conversion
- Participate in income generating grid services

*The stated power and energy capacities are baseline, or nominal, values. Actual performance can vary and may be constrained by several factors, including the state of charge (SoC), state of health (SoH) of the system, as well as thermal conditions. The hybrid model features up to 3 MPP trackers supporting up to 15kWp of PV and can easily scale from 10kWh to 20kWh by adding more batteries.

Join our installer network and stay ahead

Flexibility for customer growth

The modular design allows your customers to start small and expand storage capacity from 10kWh to 20kWh, creating opportunities for future upgrades.

Smart tools for efficient setup and support

Pixii provides installation partners with tools such as Pixii installer App, remote dashboard and 2nd line support to enhance service efficiency.

Ease of assembly and maintenance

With low-voltage (~48V DC) operation and hot-swappable modules, Pixii Home simplifies the assembly process and reduces maintenance complexity, saving time and effort.

Trusted European quality and warranty

With a focus on European manufacturing, GDPR compliance, and backed by ISO 9001 and ISO 14001 certifications, Pixii Home ensures reliability and customer satisfaction. Its 10-year or 10,000-cycle warranty* offer confidence in both product and the investment.

Pixii Academy

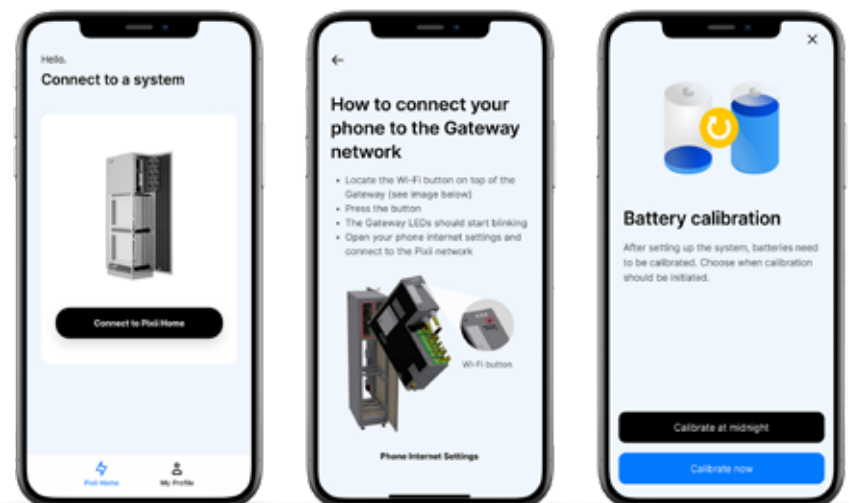

As knowledge is power, Pixii Academy provides online training and certifications tailored to installers, equipping you with the knowledge and confidence to support Pixii Home systems effectively.

* Whichever comes first.

Simplify installation with the Pixii Home Installer App

Make every Pixii Home installation fast, smooth, and error-free with the Pixii Home Installer App, your essential tool for setting up and configuring Pixii Home. From step-by-step guidance to real-time system checks, the app ensures everything runs as it should.

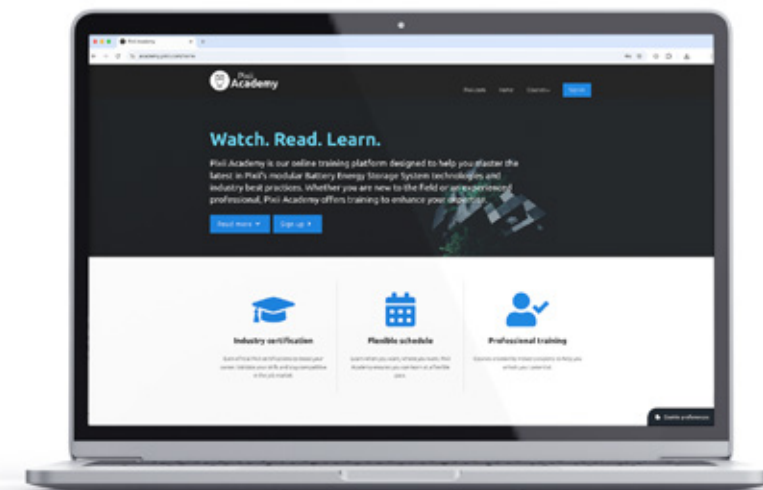

Once the system is up and running it is easy to hand over the Pixii Home system to the owner. With the Pixii Home Installer App, you spend less time on-site, avoid surprises, and deliver a professional result every time.

Pixii Academy

Explore our comprehensive training for installers and partners today.

The Pixii Academy is an online training portal designed to help partners and installers to stay updated on the latest within Pixii's modular energy storage solutions and best practices.

Join our Pixii Home training and get certified to install Pixii Home systems. The certification is mandatory for all installers and is required to offer our extended product warranty, as well as access to the Pixii Installer App.

Our online training course will provide the knowledge you need to install, maintain and commission the Pixii Home residential energy storage.

Complete the training, pass the exam, and expand your product offering in the future of energy storage solutions.

As a participant, you will gain access to training materials and future training sessions in the Pixii Academy portal.

MAXIMIZE YOUR ENERGY SAVINGS

Solar self-consumption

Store solar energy to power your home with free, clean, renewable electricity when you need it

Arbitrage¹⁾

Store energy from the grid when it's cheap to use when electricity cost is high.

Peak Shaving

Cut service fees to your grid supplier by shaving off the peaks of your energy consumption.

GENERATE INCOME

Sell your surplus energy

Make money²⁾ by selling your excess solar energy back to your local grid.

Sell grid support services

Get paid** for renting out battery capacity to help support your local grid, through ancillary services like FCR, FFR and FCAS.

1) Features like Arbitrage is expected to be available through the app during 2025. In the meantime, this functionality is accessible via third-party EMS integration.

2) Local regulations may vary - certain countries and regions impose restrictions that could impact the usage of your energy storage system.
